

## Planning & Development Department

## COMPLIANCE INSPECTION FOR FINAL ACKNOWLEDGEMENT

- ✓ A Compliance Inspection is a development permit authorizing a <u>one-time inspection</u> to verify the site is in conformance with the original approved plan set. A copy of the approved plans must be onsite for the inspector. This inspection does <u>NOT</u> authorize work to be performed.
- ✓ A Compliance Inspection is only applicable if the permit had previously been ISSUED <u>and</u> all inspections were passed EXCEPT the Final Drainage and/or Final Building Inspection.
- ✓ If construction was not in accordance to the original plan set, the result will be a failed inspection. The next step will be to apply for a new permit. Current codes, regulations, fees and standards will apply.
- ✓ If additional unpermitted activity is evident on the site, the result may be a failed inspection. Re-Inspections are <u>NOT</u> an option under this type of permit.
- ✓ Often projects require both a Final Drainage and a Final Building inspection. The Final Drainage inspection (#970) must be passed prior to receiving a Compliance Inspection for Final Building (#900). If the Final Drainage inspection fails, the project may require a Residential Alteration For Final (RAFF) permit.
- ✓ The fee for a Compliance Inspection is \$100 with a \$10 Addressing verification fee.

PERMIT TRACKING #(s):		
agent of the listed permit(s),	agree to pay all fees for service	$\_$ , the $\square$ owner or $\square$ authorized ses rendered and that construction e onsite for the inspector to review.
